

A-List Airlines

Brief

A-List Airlines has an exclusive clientele who chose to travel with us because of the exceptional facilities and services that we are able to offer. Each of our aeroplanes is equipped with the very latest designer comforts from in-flight entertainment to spa treatments. Our clients have come to expect the very highest quality in everything we do, which includes our menu.

We would like to develop a new chilled food menu that we can offer our customers; we have chosen chilled food as we believe this could offer our clients the best nutritional value and each of our aeroplanes will be able to keep the food at the optimum temperature before serving.

We fly our clients all over the world and so have to accommodate for each meal required; breakfast, lunch, dinner and snacks.

It is important for our clients to feel that their nutritional and dietary needs are met.

Our menu must include the following;

- 5 portions of fruit and vegetables
- Carbohydrates
- Calcium
- Fibre
- Protein
- Vitamins
- Minerals
- Iron

It is also important that the presentation of the food meets the highest standards.

We are able to store the food in refrigerators.
